

## Subtraction mental strategies – the jump strategy

The jump strategy is when you use a number line to jump in tens and then units. Look at  $79 - 34$ . First we jump back in tens and then units. So,  $79 - 34 = 45$ .

$$54 - 32 =$$

$$89 - 46 =$$

$$73 - 65 =$$

$$123 - 49 =$$
